

Dashboard Executive Summary

Student Name: Rhyah Austrie S. Reyes **Date:** September 15, 2026

Auto-generated by Amazon Quick from the published dashboard.

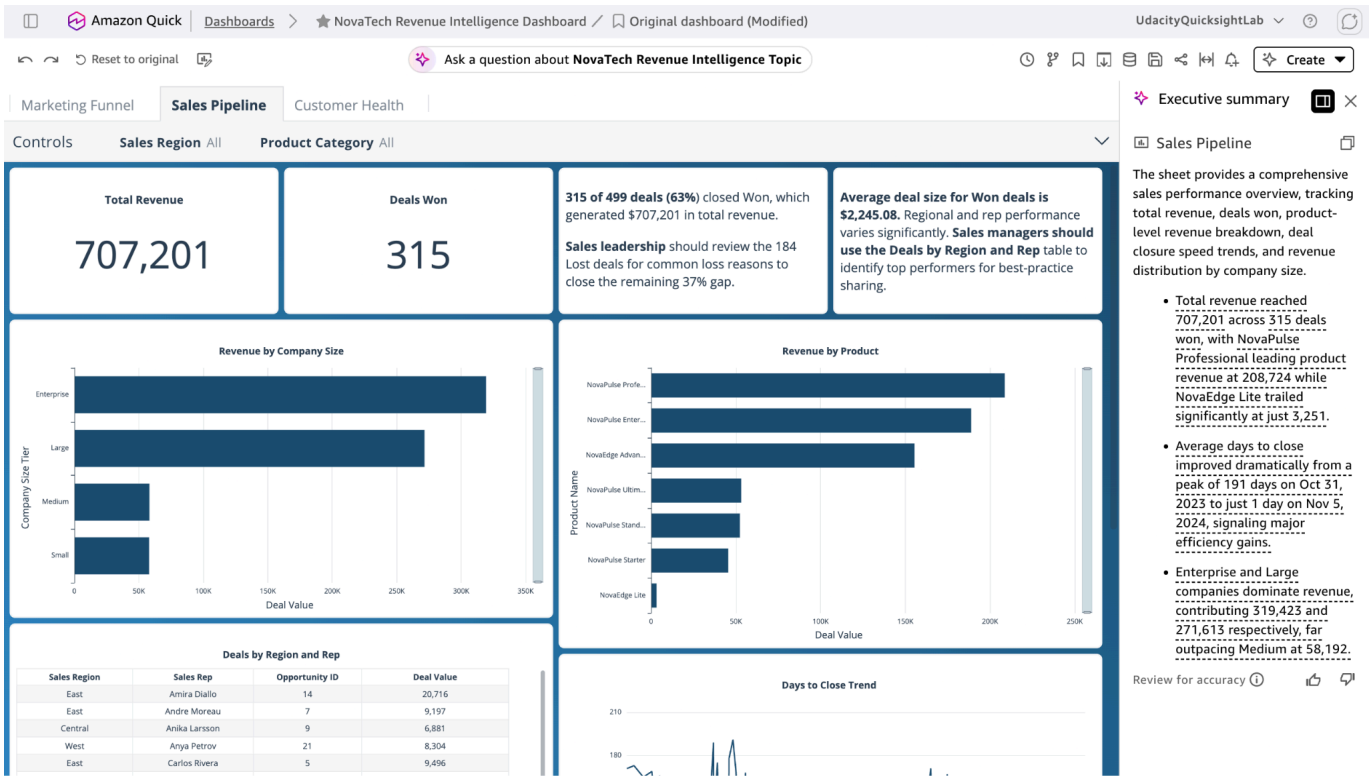

Marketing Funnel

The sheet provides an overview of lead generation and conversion performance, tracking 2,240 total leads across funnel stages, response rates, and channel effectiveness.

- The Qualified Lead stage holds the largest share of leads at 848, nearly double the next stage (Lead at 465), suggesting strong initial qualification but potential bottlenecks in advancing leads further.
- The overall campaign response rate stands at 27.19%, indicating that roughly one in four prospects engaged with outreach efforts.
- Partner Referral is the dominant conversion channel with 251 of 412 total Closed Won deals, accounting for over 60% of conversions and far outpacing Paid Social (74) and Direct Mail (73).

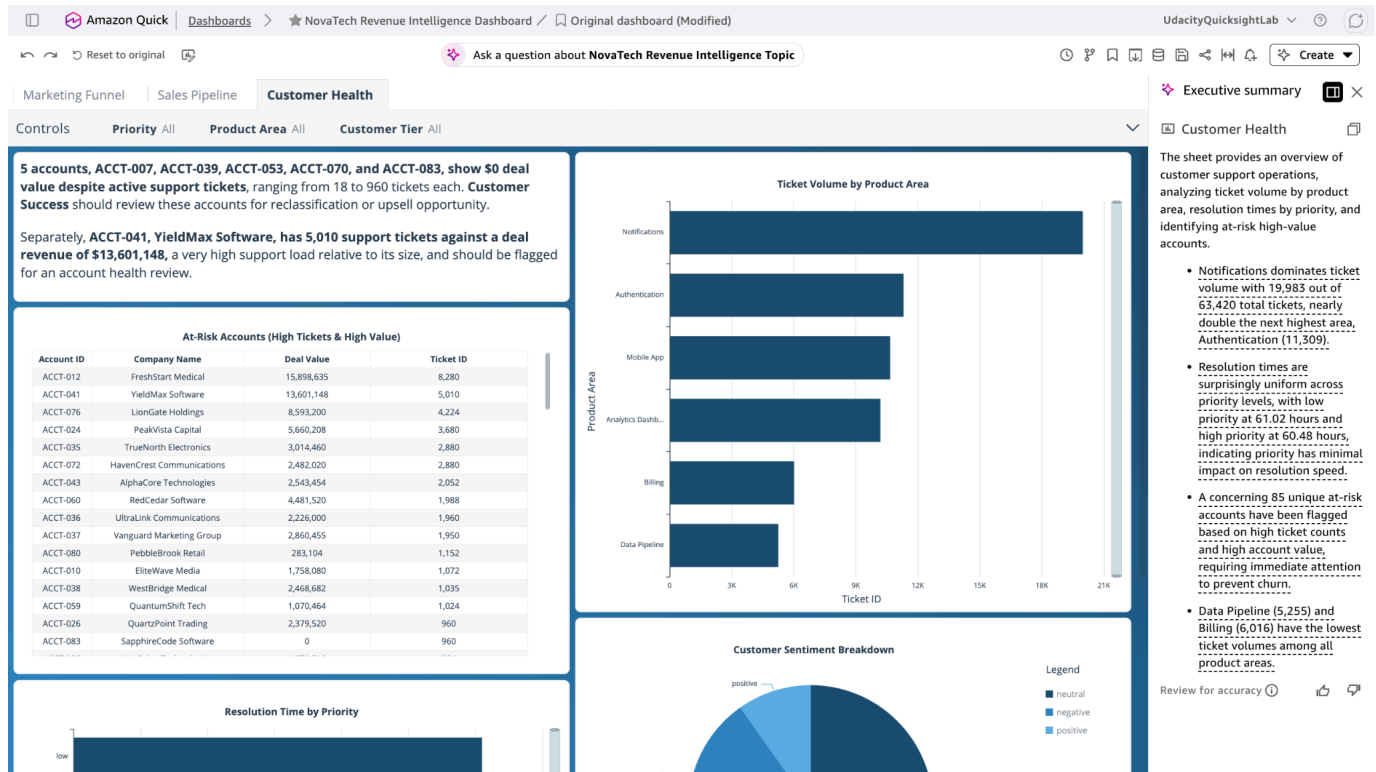

Sales Pipeline

The sheet provides a comprehensive sales performance overview, tracking total revenue, deals won, product-level revenue breakdown, deal closure speed trends, and revenue distribution by company size.

- Total revenue reached \$707,201 across 315 deals won, with NovaPulse Professional leading product revenue at \$208,724 while NovaEdge Lite trailed significantly at just \$3,251.
- Average days to close improved dramatically from a peak of 191 days on Oct 31, 2023 to just 1 day on Nov 5, 2024, signaling major efficiency gains.
- Enterprise and Large companies dominate revenue, contributing \$319,423 and \$271,613 respectively, far outpacing Medium at \$58,192.

Customer Health

The sheet provides an overview of customer support operations, analyzing ticket volume by product area, resolution times by priority, and identifying at-risk high-value accounts.

- Notifications dominates ticket volume with 19,983 out of 63,420 total tickets, nearly double the next highest area, Authentication (11,309).
- Resolution times are surprisingly uniform across priority levels, with low priority at 61.02 hours and high priority at 60.48 hours, indicating priority has minimal impact on resolution speed.
- A concerning 85 unique at-risk accounts have been flagged based on high ticket counts and high account value, requiring attention to prevent churn.
- Data Pipeline (5,255) and Billing (6,016) have the lowest ticket volumes among all product areas.
